Chicago, III., April 8.—Both the Western Union and the railway wires to the village of Prophetstown, in which fifty people were reported to have been killed by a cyclone, are still prostrated. At the Chicago, Burlington & Quincy railway, however, a trief dispatch was received before the wires went down which said that the town had been visited by a severe wind storm, which carried the station at that point from its foundation and wreeked a grain elevator and several houses. The dispatch said nothing about there being any loss of life.

The town contains about 1,000 inhabitantsand is located about forty miles from Burlington, on a branch of the Chicago, Burlington & Quincy road.

All the victims had been decapitated and their heads were missing. Their bodies were embaimed and had evidently been in the condition in which they were found for a long time.
